A trust-centric Social DAO & Network for The #Web3 Verse

Resonate.Social

The most pressing challenge/need for Web3 today is **Trust & Safety**

VB

As Web3.0 is upon us, a framework to restore trust needs to be aligned with the key underlying movements that shape the new web.

# In Web2 **we lost** our Trust & Safety

The results:

- [Massive decline of trust](#) in Web2 Social & Media

- Centralize, Opaque & Untrustworthy arbitration of content/news has led to mass migration from Web2 Social towards alternative 'Safe' networks

- New decentralized networks basically mimic 'Web2' ethos on-chain

- Web3 social/economic networks gaining toehold

Rise of Web3 has led to
defragmentation of Trust & Governance

- No singular trust-centric social platform that is fully Web3 native today

- Paucity of personal agency to manage Trust & Safety across the Web3 verse, despite the deluge of trust and safety challenges all around

- Lack of Web3-wide trust-centric tokenomics that make it easy for users to trust a source, creator, creations etc and rewards them for trust

What is missing?
A dedicated governance infrastructure for Trust

- **Governance** - Imperative to establish Trust as THE top social currency on Web3 and build dedicated governance mechanisms & currency that is specifically constituted for Trust-centric Web3 economic

- **Network** - Need for a social network that unifies key Web3 engagement mechanics and enables users to connect, curate, collaborate and create safely at scale by leveraging contemporary technology

Resonate DAO is building trust-centric, AI-enabled, Social & NFT infrastructure for Web3

Resonate DAO + Network
Designed for & Rewarded By Trust

- **Resonate DAO** - Social DAO focused on rewarding Web3 values. Allows for Web3-wide leadership & rewards based on the network's governance efficacy

- **Resonate Network** - First-ever, AI-powered, Unified Socal & NFT feeds designed for Trust-centric, automated content discovery, curation & NFT economics.

- **RESO NFT / Tokens** - NFTs uniquely designed to empower & reward participants deeply aligned with Web3 values. Tokens to be easily identifiable & synonymous with Trust across Web3

Resonate's Not-So Secret Sauce
## Built on Fetch.ai - AI for blockchain

- Resonate is built on the Fetch.ai blockchain, that empowers users to deploy ReSources - personal Digital Twins that are based on the Fetch Ai architecture

- ReSources allow users to deploy personalized AI proxies to accomplish any Web3 social economic activity on their behalf within and without the network

- ReSources can screen & sanitize content for trust, reward peers, discover trusted NFTs and trade across chains and much more
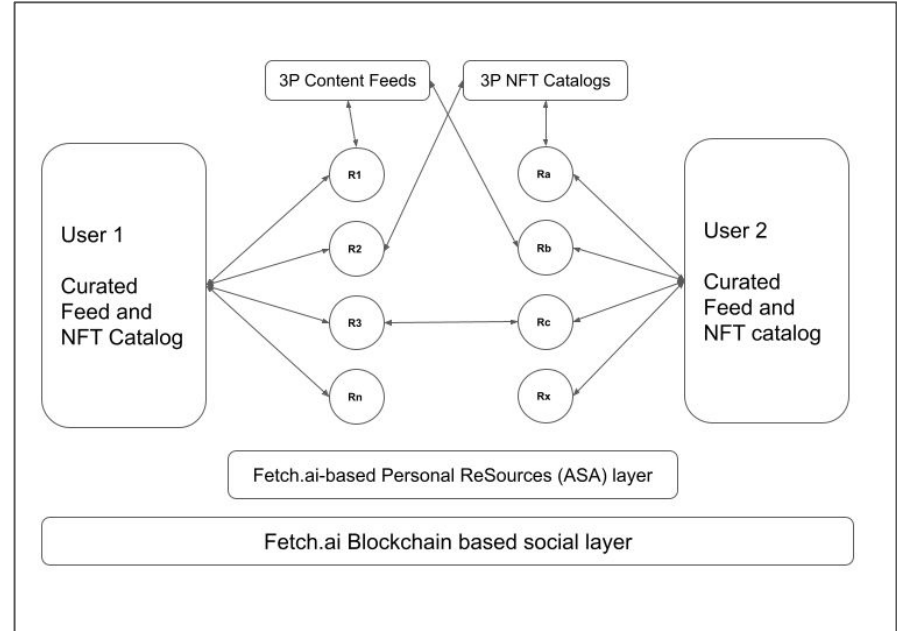

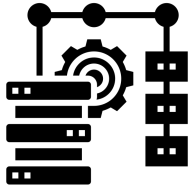

ReSources make Web3 life Safe & Simple

Users can deploy their own AI agents (ReSources) to accomplish a variety of specific / generic tasks within or across chains.

ReSources can curate for safety, Tip for Trust, Crawl for authentic NFTs, Buy/Sell based trust scores or any other core Web3 function.
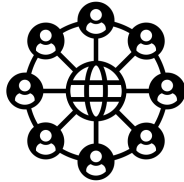

# Full Stack Solution for Trust-centric economics

Resonate DAO
Built for Trust-Centric, Trust-growing Governance

Resonate Network
Connect, Collaborate, Share content, List, Discover & Trade NFTs

ReSources
First ever Web3 implementation of AI. Deploy ASAs to manage any Web3 Need/Task

Resonate NFT & Tokens
First Ever Token explicitly for Trust & Safety. Get rewarded for auguring Web3 values
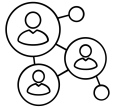

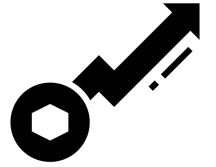

Fully interoperable
Connect, trade, validate for trust across Web3

Learn more about Resonate & our Tokenomics from our litepaper here

One network. For all of Web3

- **Connect & Curate Safely** - AI powered, Trust-centric social engagements, content curation & NFT Economics
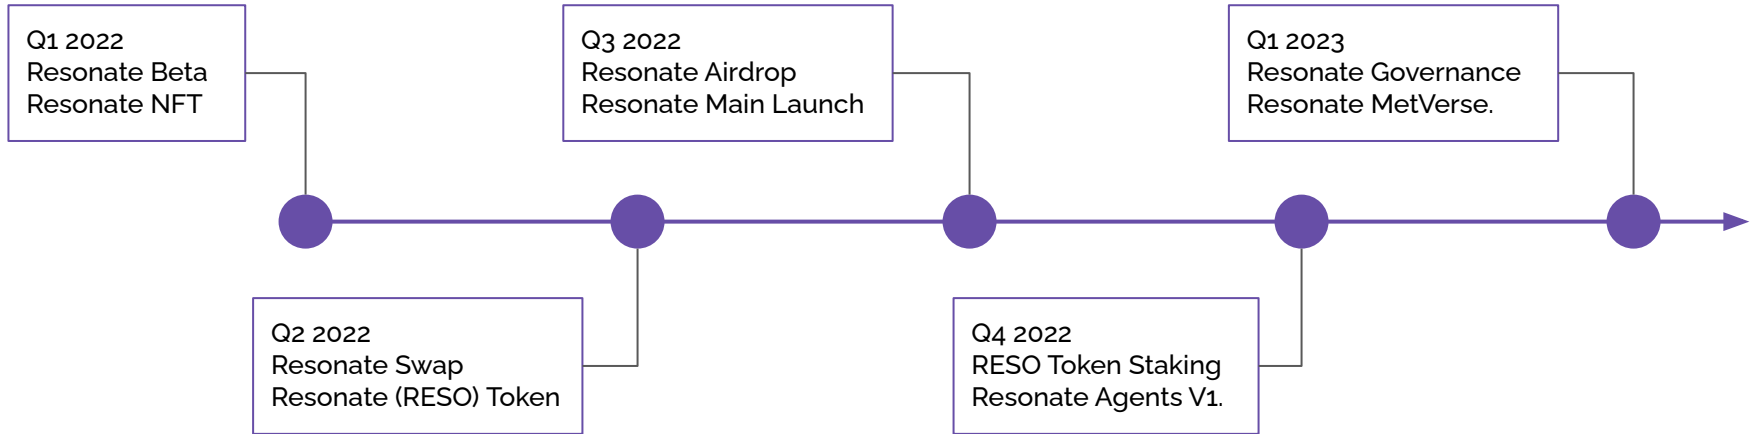

- **Earn & Leverage Trust across Web3** - Constituted to reward Trust. Users instantly aligned, identified & rewarded for Trust

- **Integrated NFT Economics** - List, discover & transact NFTs across marketplaces, natively

The Resonate Roadmap

Q1 2022
Resonate Beta
Resonate NFT

Q2 2022
Resonate Swap
Resonate (RESO) Token

Q3 2022
Resonate Airdrop
Resonate Main Launch

Q4 2022
RESO Token Staking
Resonate Agents V1.

Q1 2023
Resonate Governance
Resonate MetVerse.

Trust-First Governance Fans.
Join the Resonate DAO

- **Community** - Decentralized Governance enthusiasts passionate about core Web3 values of Trust & Safety

- **Mission**- Enable the primacy of trust as the most valuable social currency through practical & innovative tokenomics across Web3

- **Innovation** - Leverage the power of AI & Blockchain to simplify, unify & reward full-spectrum Web3 user experience rooted in Trust
